- BeFunky (D): photo editor and collage creator (some grid types are not free)

Legenda:

A = available for Android

M = available for Apple devices (iPhone/iPad)

D = available for desktop/laptop computrr

Activity

- Download Snapseed and Photogrid

- Edit 2 photos with Snapseed
  - Write on one photo
  - Apply a filter to another

- Create a collage with 4+ photos on **Photogrid** (with Tablet and Phone) or **BeFunky.com** (with computer and laptops - some grid types are not free)

How to use it in class

- Collage about each student to help them present

- For storytelling

- Give assignments to groups to find pictures about a topic

- Good for introducing a new topic or lesson

- Positive aspect: improve cooperation and teamwork

how to use it in class

- To prepare engaging multimedia

- To create small assignment for the students

- To sum up or introduce a subject with a photo collage

- To sum up a process step by step

- To challenge the students to create their own collage

Video

- Magisto (A/M/D): video creation

- Lenso create (A/M): virtual whiteboard
